Whatever you need professionally cleaned, Buzil will master the challenge with aplomb. Our powerful, tried-and-tested products are only part of what makes us special. An individual initial consultation is the first step towards choosing the product that meets your requirements. We also offer a range of additional services to ensure consistently brilliant results for you. Our services include recommendations for use as well as training through seminars and product training, provision of technical and safety-related documents as well as creating cleaning and disinfection schedules and a 24-hour hotline. For quick and easy access to information, look no further than our smart online cleaning adviser. Simply enter a few basic details, and you will receive personalised recommendations for cleaning and care as well as matching product recommendations. Our handy colour coding system will also make the choice easier for you.

Would you like to learn more about perfect cleanliness made by Buzil? Simply visit our website at **www.buzil.com** or call us on **+49 8331 930-730.** We look forward to discussing your requirements!

YOUR INNOVATIVE PARTNER FOR PERFECT CLEANLINESS FOR MORE THAN 100 YEARS

More than 140 professional experts under one roof, exports into over 35 countries and a strong global presence: Buzil is an international pace setter and market leader in contemporary cleaning, care, hygiene and disinfection solutions. With a subsidiary in Poland, a branch office in the United Arab Emirates and sales offices in Benelux- and Balkan States, Buzil is now expanding into the South-East Asian market. In 2013, Buzil Rossari Pvt. Ltd. was founded as a joint venture in India.

Whether customers require professional facility cleaning or specialist services for industrial, hotel, catering and care facilities – our Memmingen-based company has a proud tradition of developing, manufacturing and delivering first-rate solutions for almost any application as well as bespoke private label solutions for specific customer requirements.

Our success is primarily based on our extraordinary power of innovation. Working closely with our customers, more than 10% of our staff are engaged in product development and optimisation on a permanent basis.

The outcome is an intelligent combination of ultimate safety, efficiency and sustainability. For cleaning solutions that continue to set standards.

INNOVATION

Sustainability is an integral part of the Buzil family tradition.

Family-owned for over a century, Buzil is currently run by two members of the fourth generation, Isabell Janoth and Thomas Ulbricht. The company's endeavour to reconcile ecological and economic objectives to the best of our abilities is deeply rooted in this long history. Our environmentally friendly Planta® product range is a direct outcome of this ethos.

However, Buzil's commitment to sustainability goes far beyond product development as such. As early as 2002, we received DIN ISO 14001 certification for our environmental management system.

As a member of the Bavarian Environmental Alliance (Umweltpakt Bayern) since 1995, Buzil has made additional voluntary environmental commitments. Since 2011, Buzil has also been a DIAMOND member of the UAE Business Council for Sustainable Development (BCSD).

We constantly keep an eye on the larger picture to create pioneering cleaning solutions. Or to put it differently: perfect cleanliness that lasts.

TRADITION

BRILLIANT SOLUTIONS FOR ANY CHALLENGE.

SURFACE

Some are varnished, some are high-gloss, some are matt. Some are made of ceramics or glass, some of leather, metal or sensitive plastics such as acrylic glass and perspex. Like many other things in everyday life, surfaces come in many shapes and sizes. They all have unique characteristics and have to withstand specific stresses. This means that choosing the right cleaning product for each type of surface is absolutely essential.

From ready-to-use, highly concentrated or certified environmentally friendly all-purpose cleaners to glass cleaners, gloss surface cleaners and alcohol-based agents to plastic, furniture and leather care: Buzil offers the right solution for any requirement. Our concentrated cleaners can be diluted to different extents depending on the level of dirtiness and the field of application. The correct dosage saves money and protects the environment.

Whether it's professional facility cleaning, maintenance or intensive cleaning, cleaning properties or industrial equipment – Buzil products always deliver a perfect result. Reliable, material-compatible, fast and streak-free.

Daily routine cleaning Intensive cleaning

Neutral all-purpose cleaner, intense fragrance

pH 7

Blitz Citro G 481

For all water-resistant surfaces e.g. plastic surfaces, glass surfaces, doors, window frames and heaters; water-resistant floor coverings; water-resistant materials

Product advantages
- Material-compatible multi-purpose cleaner
- With fresh citrus scent
- Dries quickly without streaks
- Ideal for shiny surfaces
- Good cleaning effect
- Leaves brilliant shine

Container
40 ml, 1 l, 5 l, 10 l, 200 l

20 - 50 ml / 10 l water

50 ml / 600 ml water

Blitz Orange G 482

Fragrance variant orange

Container
1 l, 10 l, 200 l

Blitz Tropic G 483

Fragrance variant tropical

Container
1 l, 10 l, 200 l

Surfactant-free and citrate-based universal cleaner, alkaline

pH 10

0 Tens G 500

For moisture-resistant and colour-fast surfaces; porcelain stoneware tiles; wall and ceiling cleaning; upholstery and textile coverings; also suitable for acrylic glass

Product advantages
- Spontaneous cleaning effect
- No tenside residue
- Significantly reduces re-soiling of stoneware and textile coverings and surfaces
- Colourless and odorless
- Perfect for alternating use with 0 Tens Azid G 501

Container
1 l, 10 l, 200 l

200 - 1000 ml / 10 l water

50 ml / 600 ml water

Ready-to-use spray cleaner

pH 10

Reso Clean G 515

For all water-resistant surfaces such as glass and plastic surfaces; stainless steel; formica; keyboards

Product advantages
- Powerful and excellent cleaning effect
- Effortlessly removes nicotine and grease marks, as well as marks from handling
- Long-lasting fragrance
- Leaves behind a streak-free shine without final drying

Container
600 ml, 10 l

neat

Ecological surface daily routine cleaner, highly concentrated

pH 10

Planta® Orange P 311

For all water-resistant surfaces and floor coverings; suitable for industrial kitchens, gastronomy and food-processing industry

Product advantages
- Eco-certified
- With fresh orange fragrance
- Excellent cleaning capacity
- Especially good on oily and greasy dirt
- Declaration of clearance for the food industry

Container
1 l, 10 l

20 - 50 ml / 10 l water

50 ml / 10 l water

Ecological universal cleaner

pH 7

Planta® Soft P 313

For all water-resistant, shiny materials, surfaces and floor coverings; particularly suitable for glass and plastic surfaces; shiny artificial and natural stone

Product advantages
- Eco-certified
- Produces a bright sheen
- Dries quickly without streaks
- Gentle on surfaces
- Foam-inhibited, therefore also suitable for use in cleaning machines

Container
1 l, 10 l

20 - 50 ml / 10 l water

50 ml / 10 l water

50 ml / 600 ml water

Ready-to-use universal spray cleaner with odour blocker

pH 8

Drizzle® Blue SP 20

For water-resistant surfaces e.g. plastics, glass and mirror surfaces; painted, high-gloss surfaces; ceramic and metal surfaces; suitable for acrylic glass (PMMA)

Product advantages
- Deodorising fresh fragrance with active odour blocker
- Spray – Wipe – Done
- Outstanding dirt dissolving power thanks to the easy-to-clean effect
- High material compatibility
- Value for money due to low consumption
- Leaves behind a streak-free shine

Container
600 ml, 10 l

neat

Neutral mild and plastic cleaner

pH 6,5

Vario Clean Trendy T 560

For water-resistant surfaces and materials such as resopal doors, window frames, heatin radiators, plastic and glass surfaces, stone and tiled floors; especially for cleaning of sensitive materials e.g. acrylic glass, school boards and aluminium

Product advantages
- Powerful, fast cleaning effect
- Low re-soiling thanks to the easy-to-clean effect
- Material-friendly
- Good dispersing properties
- Leaves behind a streak-free shine without final drying

Container

For sensitive surfaces and material e.g. wood, plastic, stainless steel and metal; ideal for cockpit care in the motor vehicle sector

Product advantages
- Cleans, cares and preserves in one single step
- Antistatic effect reduces re-soiling
- Refreshes colour

Container
300 ml

neat

Ready-to-use stain remover — pH 11

Clean Up G 555

For solvent-resistant surfaces and materials such as desks, keybords, telephones; removes soiling from pencils, water-insoluble felt tips, ballpoint pens, ink and stamping ink

Product advantages
- Intensive cleaning effect
- Economical to use
- Targeted cleaning possible

Container
600 ml

neat

Ready-for-use surface and plastic cleaner — pH 9,5

Buz® Mark Ex G 559

For solvent-resistant materials and surfaces such as plastics, tables, keyboards, doors, whiteboards, etc.; easily removes marks made by pencil, ink, felt-tip pen, marker pens, ballpoints and stamping ink, as well as sticky label residue

Product advantages
- Intensive cleaning performance
- Very strong removal power on water-insoluble soiling
- Highly material-compatible thanks to moderate pH value
- For selective cleaning
- Pleasant aroma

Container
600 ml, 5 l

neat

Ready-to-use glass cleaner — pH 8

Profiglass G 522

For cleaning of interior glazing and surfaces such as mirrors, frames, plastic and car windows

Product advantages
- Good cleaning effect
- Handy spray nozzle
- Targeted cleaning possible
- Dries quickly without streaks

Container
600 ml, 10 l

neat

Glass and frames cleaner concentrate — pH 6,5

Buz® Windowmaster G 525

For cleaning of large exterior glazing, windows, frames, formica surfaces and glass covers on PV modules

Product advantages
- Anti-soiling effect for delayed re-soiling
- Even, stable microfoam
- Outstanding squeegee sliding behaviour
- Optimum removal of insect marks

Container
1 l, 10 l

100 ml /
10 l water

Ecological, ready-to-use glass cleaner — pH 8

Planta® Clear P 316

Ideal for cleaning of interior glazing and surfaces such as mirrors, frames, plastic and car windows

Product advantages
- Eco-certified
- Good cleaning performance, especially on greasy deposits
- Handy spray nozzle
- Targeted cleaning possible
- Dries quickly without streaks

Container
600 ml, 10 l

neat

Ecological, glass and frames cleaner concentrate — pH 6,5

Planta® View P 318

Ideal for cleaning of exterior glazing, windows, window frames, car windows, glass covers on PV modules

Product advantages
- Eco-certified
- Anti-soiling effect for delayed re-soiling
- Even, stable microfoam
- Outstanding squeegee sliding behaviour
- Optimum removal of insect marks

WE MAKE SURE EVERY SURFACE COMES CLEAN.

SANITARY

Lime scale, dirt and soap residue, grease, urine deposits and other common types of soiling: sanitary areas such as lavatories, bathrooms, changing rooms, showers, washrooms, saunas and swimming pools pose particular challenges when it comes to cleaning, not least because various fittings from toilet bowls to taps to cupboards are often integrated. As well as largely acid-resistant materials such as porcelain stoneware tiles, ceramics, granite etc., they can also contain numerous acid-sensitive materials such as marble, terrazzo, grouting material or coloured plastic components.

The agents and methods used have to be perfectly matched to the facility, soiling and water hardness in question. This is a challenging task, which our versatile range of maintenance and basic cleaning agents will help you master for any sanitary and wet application.

Daily routine cleaning

Basic cleaning

Sanitary daily routine cleaner based on amidosulphuric-acid, colourless

pH 0,5

Bucasan® Clear G 463

For all acid-resistant materials and surfaces in wet areas and swimming pools; colour-sensitive surfaces and joints

Product advantages
- Easily dissolves limescale, dirt residue and soap residue
- Low re-soiling thanks to the easy-to-clean effect
- Leaves behind a streak-free shine
- RK listed

Container
1 l, 10 l, 200 l

20 - 50 ml / 10 l water	200 - 1000 ml / 10 l water	1 : 5 to 1 : 10 with water	50 ml / 600 ml water

Sanitary daily routine cleaner based on amidosulphuric-acid, acidic

pH 0,5

Bucazid® S G 467

For all acid-resistant materials in all wet-room and sanitary applications such as tiles, washbasins, toilets; sanitary china, chrome and stainless-steel surfaces, wall and floor tiles

Product advantages
- Easily dissolves limescale, dirt residue and soap residue
- Powerful cleaning effect
- Deodorising fragrance with active odour blocker
- Leaves behind a streak-free shine
- RK listed

Container
1 l, 10 l, 200 l

neat to 50 ml / 10 l water	200 - 1000 ml / 10 l water	50 ml / 600 ml water	

Sanitary daily routine cleaner, acid-free

pH 5

Bucal G 468

For all wet-room and sanitary applications; acid-sensitive materials e.g. enamel, aluminium, brass, marble, shell lime etc.; water-resistant surfaces and floors; for use in soft-water areas; waterless toilets

Product advantages
- Deodorising fragrance with active odour blocker
- Material-friendly with good cleaning effect
- Beading effect to dry streak-free without final drying
- Regular application prevents lime build-up

Container
1 l, 10 l

50 - 100 ml / 10 l water	1 : 5 to 1 : 10 with water	50 ml / 600 ml water

Sanitary daily routine cleaner, alkaline

pH 10,5

Buz® Alkasan G 469

For all wet-room and sanitary applications; all water-resistant surfaces e.g. taps, washbasins, bathtubs, stainless steel, tiles, etc.

Product advantages
- Lasting fragrance
- High grease, oil and lime soap-removing action
- Effortlessly removes sebum, mineral oils and greases and stubborn residues of lime soap, soap and cosmetics
- With regular application, the beading effect prevents lime build-up
- Beading effect to dry streak-free without final drying

Container
1 l

20 - 50 ml / 10 l water	100 - 1000 ml / 10 l water	1 : 1 to 1 : 10 with water	50 ml / 600 ml water

Ecological sanitary daily routine cleaner based on citric-acid

pH 2

Planta® San P 312

For all wet-room and sanitary applications; all acid-resistant materials e.g. sanitary china, chrome and stainless-steel surfaces, wall and floor tiles

Product advantages
- Eco-certified
- With fresh fragrance
- Good cleaning effect
- Dissolves limescale, urine deposits and other mineral dirt
- Low consumption compared with conventional products
- RK listed

Container
1 l, 10 l

neat to 50 ml / 10 l water	50 ml / 10 l water	50 ml / 600 ml water

Ecological sanitary daily routine cleaner based on methane-sulphonic-acid

pH 0,5

Planta® San Intense P 319

For all wet-room and sanitary applications; all acid-resistant materials and surfaces e.g. washbasins, toilets, urinals, wall and floor tiles; particularly suitable for sanitary china, chrome and stainless steel surfaces

Product advantages
- Eco-certified
- Dissolves limescale, urine deposits and other mineral dirt
- Also suitable for basic cleaning
- Concentrate – low consumption compared with conventional products

Container
1 l, 10 l

neat to 50 ml / 10 l water	200 ml / 10 l water	200 - 1000 ml / 10 l water	1 : 5 to 1 : 10 with water	50 ml / 600 ml water

Ready-to-use sanitary foam cleaner, acidic

pH 2

Drizzle® Red SP 10

For use in all sanitary and wet areas in hotels, offices and public buildings; all acid-resistant materials and surfaces; particularly suitable on chrome surfaces

Product advantages
- Outstanding dirt dissolving power
- Easily dissolves limescale, cosmetics residue and soap residue
- Low re-soiling thanks to the easy-to-clean effect
- Leaves behind a streak-free shine without final drying
- Material-friendly because product is foamed
- Value for money as used sparingly

Container
600 ml, 10 l

neat

Ready-to-use sanitary spray cleaner, acid-free

pH 6

Drizzle® Red7 SP 40

For all wet-room and sanitary applications; all acid-sensitive materials e.g. enamel, aluminium, brass, marble, shell lime, acrylic glass etc.; water-resistant surfaces and floors; for use in soft-water areas; waterless toilets

Product advantages
- Easily dissolves cosmetics residue and soap residue
- Reduces limescale deposits
- Low re-soiling thanks to the easy-to-clean effect
- Material-friendly
- Value for money as used sparingly

Container
600 ml, 10 l

neat

Sanitary daily routine cleaner based on amidosulphuric-acid, intense fragrance

pH 0,5

Bucasan® Trendy T 464

For all acid-resistant materials in all wet-room and sanitary applications e.g. tiles, washbasins, toilets; sanitary china, chrome and stainless-steel surfaces, wall and floor tiles

Product advantages
- Powerful cleaning effect
- Effective removal of lime, dirt and soap deposits
- Immediate streak-free shine due to pearling off effect
- Leaves a pleasant atmosphere in the room
- Kind to chrome and stainless steel
- RE and RK listed

Container
1 l, 5 l, 10 l, 200 l, 950 l

neat to 50 ml / 10 l water | 200 - 1000 ml / 10 l water | 1 : 5 to 1 : 10 with water | 50 ml / 600 ml water

Bucasan® Pino T 465

Fragrance variant pine

Container
1 l, 10 l, 200 l

Sanitary daily routine cleaner, acid-based with odour blocker

pH 2,5

Bucasan® Sanibreeze G 454

For all wet-room and sanitary applications; for all acid-resistant materials and surfaces e.g. tiles, washbasins and toilet bowls; particularly suitable for sanitary china, chrome, stainless steel and aluminium surfaces

Product advantages
- Deodorising fresh citrus fragrance with active odour blocker
- Easily dissolves limescale, dirt residue and soap residue
- Outstanding cleaning performance
- Immediate streak-free shine due to pearling off effect
- Suitable for application with foam gun and a single-disc machine

Container
1 l, 10 l

neat to 100 ml / 10 l water | 200 - 1000 ml / 10 l water | 1 : 5 to 1 : 10 with water | 50 ml / 600 ml water

Viscous acid-based sanitary daily routine cleaner

pH 2,5

Bucasan® Sanibond G 457

For all wet-room and sanitary applications; for all acid-resistant materials and surfaces e.g. tiles, washbasins and toilet bowls; ideally suitable for sanitary china, chrome, stainless steel and aluminium surfaces, wall and floor tiles

Product advantages
- Easily dissolves limescale, dirt residue and soap residue
- Outstanding cleaning performance
- Immediate streak-free shine due to pearling off effect
- High viscosity enables very good adherence to vertical surfaces
- Hygienically fresh Strawberry-fragrance
- Suitable for application with foam gun

Container
1 l, 10 l

neat to 100 ml / 10 l water | 1 : 5 to 1 : 10 with water | 50 ml / 600 ml water

Notice: Bucasan Saniflow G 458 will expire at the end of the year 2019. Alternative product: Bucasan® Sanibreeze G 454

Viscous sanitary basic cleaner based on phosphoric-acid — pH 0,5

Bucalex® G 460

For all acid-resistant materials and surfaces in wet areas and in swimming pools; sanitary china; stainless-steel surfaces

Product advantages
- Dissolves stubborn dirt such as limescale, urine deposits, rust, scale, dirt, grease and soap residue
- Powerful, fast cleaning effect
- Viscosity enables good adherence to vertical surfaces and thus a long reaction time
- RK listed

Container
1 l, 10 l, 750 l

neat to 100 ml / 10 l water | 1000 ml / 10 l water | 1 : 5 to 1 : 10 with water

Liquid, colourless lime remover and basic cleaner based on phosphoric-acid — pH 0,5

Buz® Contracalc G 461

For all applications in the sanitary, bathing and food industry; appliance decalcification; swimming-pool cleaning; cement-residue removal; all acid-resistant materials and surfaces

Product advantages
- Removes lime incrustation, rust and scale
- Fragrance-free
- Spontaneous cleaning effect
- RK and RE listed

Container
1 l, 10 l

100 ml / 10 l water | 200 - 1000 ml / 10 l water | 200 - 500 ml / 10 l water | 1 : 5 to 1 : 10 with water

RESEARCH & DEVELOPMENT

GOING FROM STRENGTH TO STRENGTH. BECAUSE WE ALWAYS HAVE A DEFINITE GOAL IN SIGHT:

FINDING THE BEST SOLUTION.

In 1953, the then managing director Franz Wagner launched Buzil as a commercial operation. Since then, the company has grown into one of the most cutting-edge chemical enterprises in Europe. In the process, something has arisen which still shapes our company today: a strong pioneering spirit. Ever since we started developing and manufacturing our own products, we are no longer satisfied with the current state of the art. Instead we always look to the future and try to stay a step ahead. Because we want to keep delighting our customers with new ideas and solutions. This is why a large proportion of our staff are exclusively engaged in research and development. What do our clients need? What specific products and qualities are they looking for? Is there any room for improvement? What can we do to increase the cost-efficiency, safety and convenience of daily professional cleaning tasks?

Our highly qualified experts know the answers to these key questions. They bring many years of experience and expertise, cutting-edge technology and a passion for perfect cleanliness to the task.

WE'LL GET TO THE BOTTOM OF IT.

FLOOR

Different types of flooring – whether it's PVC, linoleum, rubber, natural or man-made stone or ceramics – need different kinds of care in order to remain in optimal shape both aesthetically and functionally for many years. That's why the Buzil range is comprised of a wide variety of different cleaning and care products. This includes industrial products that are suitable for oil separators in compliance with the Austrian standard (ÖNORM), suitable solutions for sports flooring (DIN 18032/2) or for particularly high ecological demands. Buzil has everything you need to meet the challenges of daily maintenance, intensive and basic cleaning as well as handling different types of coating, the coating repair films and special cleaning processes.

We can also deliver a number of trainings and specialist seminars, e.g. on flooring expertise and the different cleaning techniques and methods required for different types of flooring. Our comprehensive services from individual property analysis to creating bespoke cleaning schedules to property-specific dosage systems ensure that you will always be on safe ground when it comes to cleaning floors.

Daily routine cleaning Intensive cleaning Basic cleaning Coating

Wiping care based on water-insoluble polymers and waxes — pH 9,5

Suwi Glanz G 210

For water-resistant, decalcified floor coverings; unsealed, waxed and oiled parquet; marble, concrete stone, clinker and terracotta

Product advantages
- Good filling properties and high self-shine properties
- Forms a resistant protective film
- Suitable for cleaners
- Cares with good cleaning effect
- For application in cleaning machines

Container
1 l, 200 l

50 ml / 10 l water | 100 ml / 10 l water | 1 : 1 to 1 : 3 with water

Wiping care based on water-soluble polymers — pH 7

Unibuz G 235

For all water-resistant floor coverings such as PVC, rubber, linoleum, unsealed parquet and cork, concrete stone and natural stone

Product advantages
- For universal use
- Cleans and cares in one single step
- Dries quickly without streaks
- Silky matt shine without layer build-up
- Slip-resistant pursuant to DIN 51131

Container
40 ml, 1 l, 10 l, 200 l

50 ml / 10 l water | 50 - 150 ml / 10 l water

Soap-based wiping care — pH 10,5

Buz® Soap G 240

For water-resistant floor coverings such as clinker, marble, terracotta, rubber and PVC; oiled and waxed wooden floors; conductive floor coverings

Product advantages
- Antistatic
- Leaves behind a silky matt shine
- Polishable with single-disc machine
- Slip-retardant
- Cleans and cares in one single step

Container
1 l, 10 l

50 ml / 10 l water | 100 ml / 10 l water

Highly concentrated wiping care based on water-soluble polymers — pH 8,5

Garuda HC 20

For water-resistant floor coverings e.g. PVC, rubber, linoleum, sealed parquet and cork, concrete stone and natural stone; sports floors

Product advantages
- Cleans and cares in one single step
- Dries without streaks
- Extremely economical
- Prevents footwear marks
- Dirt-repellent
- Self shining without layer build-up
- Slip-retardant and antistatic
- Polishable using a high-speed machine
- Tested according to FMPA DIN 18032/2 for sports floors

Container
1 l

10 - 20 ml / 10 l water | 40 ml / 10 l water | 100 ml / 10 l water | 1 : 10 with water

Ecological wiping care based on water-soluble polymers — pH 8,5

Planta® Cleen P 315

For all water-resistant floor coverings e.g. PVC, rubber, linoleum, sealed parquet and cork, concrete stone and natural stone

Product advantages
- Eco-certified
- Cleans and cares, without layer build-up
- Extremely economical
- Leaves a satin gloss on the surface
- Prevents footwear marks and is dirt-repellent
- High-speed polishable
- Tested according to FMPA DIN 18032/2 for sports floors

Container
1 l, 10 l

20 - 50 ml / 10 l water	50 - 100 ml / 10 l water	500 ml / 10 l water	1 : 3 with water	300 ml / 10 l water

Wiping care based on water-soluble polymers — pH 8,5

Corridor® Daily S 780

Particularly suitable for sports floor coverings in sports halls, gymnasiums or multi-purpose halls; for water-resistant floor coverings e.g. PVC, rubber, linoleum, sealed parquet and cork, concrete stone and natural stone

Product advantages
- Cleans and cares in one single step
- Very good wetting properties
- For application with a single-disc machine or high-speed machine
- Self shining without layer build-up
- Slip-retardant
- Tested according to FMPA DIN 18032/2 for sports floors

Container
1 l, 10 l, 200 l

20 - 50 ml / 10 l water	50 - 100 ml / 10 l water	1 : 3 with water	500 ml / 10 l water	300 ml / 10 l water

Wiping care with odour blocker — pH 8,5

Corridor® Cibreeze Wipe S 790

For use in public buildings, hospitals, care and nursing homes, social education facilities such as schools and nursery schools; for water-resistant floors e.g. PVC, rubber, linoleum, sealed parquet and cork, concrete stone and natural stone

Product advantages
- Water-soluble, redispersible polymers-based
- Excellent cleaning performance with one-step wet mopping
- Fresh, deodorising fragrance with active odour blocker
- Cleans and cares in one single step, without layer build-up
- Dirt-repellent with very good cleaning properties
- Suitable for the spray-cleaning processes
- Tested according to FMPA DIN 18032/2 for sports floors

Container
1 l, 10 l

20 - 50 ml / 10 l water	50 - 100 ml / 10 l water	1 : 3 with water	500 ml / 10 l water	300 ml / 10 l water

Floor daily routine cleaner for PUR finishes — pH 10,5

Corridor® PUR Clean S 766

For all water-resistant floor coverings, particularly suitable to daily routine cleaning of factory-applied PUR treated elastic coverings of linoleum and PVC, vinyl and luxury coverings such as click and glue down flooring, as well as for sealed parquet; also suitable for PE and PP coverings as well as synthetic resin screeds with and without PUR

Product advantages
- Intensive cleaning effect
- Can be used as an intensive cleaner for end of construction cleaning
- Pleasant fragrance
- Excellent dirt-carrying properties
- Streak-free cleaning
- Very good material compatibility
- Tested according to FMPA DIN 18032/2 for sports floors

Container
1 l, 10 l

20 - 50 ml / 10 l water	50 - 100 ml / 10 l water	100 - 150 ml / 10 l water

Gloss cleaner — pH 8

Buz® Wipe G 270

For laminate flooring; sealed parquet; ceramic flooring and highly polished stone floors

Product advantages
- Good cleaning effect
- Dries quickly without streaks
- Slip-retardant
- Good wetting properties
- Dye-free

Container
1 l, 10 l

50 ml /
10 l water

Floor daily routine cleaner, ultra-wetting — pH 9,5

Roca Wipe R 300

For hard-to-wet floor coverings; elastic, tempered coverings; impregnated natural stone coverings

Product advantages
- Outstanding dirt dissolving power
- Residue-free and streak-free cleaning
- Suitable for one-step wet mopping
- Pleasant fresh fragrance
- Ultra wetting

Container
1 l, 10 l

50 ml /
10 l water

50 - 100 ml /
10 l water

Gloss cleaner based on alcohol — pH 6

Polybuz® Trendy T 201

For all water-resistant floor coverings requiring no care such as sealed parquet, laminate, granite, ceramic tiles and porcelain stoneware tiles etc.

Product advantages
- Leaves no care substances behind
- Preserves shine
- Dries quickly without streaks
- Fresh Trendy-fragrance
- RK listed

Container
1l, 10 l

50 ml /
10 l water

50 - 150 ml /
10 l water

Neutral machine cleaner — pH 7,5

Buz® Match Trendy T 265

For sports floor coverings in sports halls, gymnasiums or multi-purpose halls; all water-resistant floor coverings requiring no care e. g. sealed parquet, elastic floor coverings, natural and artificial stone, ceramic and porcelain stoneware tiles

Product advantages
- Dries very quickly without streaks
- Slip-retardant
- Fresh Trendy-fragrance
- Tested according to FMPA DIN 18032/2 for sports floors
- Without layer build-up

Container
10 l, 750 l

100 ml /
10 l water

Quick-drying machine cleaner, highly alkaline — pH 14

Indumaster® Fast IR 14

For use in industrial applications; on alkali-resistant and water-resistant floor coverings such as PVC, stone (unpolished), epoxy resin, concrete flooring, clinker and earthenware slabs

Product advantages
- Quick-drying
- Dissolves oily and grease dirt
- With foam brake
- Removes rubber abrasion
- Fast-separating according to standard ÖNORM B 5105

Container
10 l, 200 l

150 - 500 ml / 10 l water

Alkaline industrial cleaner — pH 13

Indumaster® Radical IR 40

For use in industrial applications and workshop areas; all alkali-resistant floors and surfaces

Product advantages
- For universal use
- Tough dirt dissolving power
- Especially to clean oils and greases
- Foam-inhibited
- Fast-separating according to standard ÖNORM B 5105

Container
10 l, 200 l

100 - 200 ml / 10 l water | 500 - 1000 ml / 10 l water | 100 - 500 ml / 10 l water | 1 : 5 to 1 : 10 with water

Solvent-based industrial and sports floor cleaner — pH 5

Indumaster® Forte IR 42

For use in industrial applications and workshop areas; proven in sports halls and warehouse floors; solvent-resistant floors and surfaces

Product advantages
- Good cleaning effect
- Removes heel marks, rubber abrasion and tyre abrasion from forklifts, lift trucks, handball resin etc.
- Targeted cleaning possible
- Foam-inhibited

Container
10 l, 200 l

100 - 200 ml / 10 l water | 500 - 1000 ml / 10 l water | neat to 1 : 2

High performance industrial cleaner, highly alkaline — pH 13,5

Indumaster® Strong IR 45

For use in industrial applications and workshop areas; all alkali-resistant floors and surfaces; fire-damage restoration

Product advantages
- Outstanding dirt dissolving power
- Dissolves the stubbornest of dirt e.g. heavy soot, oil and grease deposits, graphite and rubber abrasion
- High dispersing properties

Container
1 l, 10 l, 200 l, 950 l

100 ml / 10 l water | 100 - 500 ml / 10 l water | 1000 ml / 10 l water | 1 : 5 bis 1 : 10 with water

Ecological industrial cleaner — pH 10

Indumaster® Universal IR 55

For use in industrial applications and food industry such as production machinery; all water-resistant materials, surfaces, floors

Product advantages
- Very good dirt, grease and oil dissolving power
- Eco-certified
- Material-friendly with good cleaning performance
- Fast-separating according to standard ÖNORM B 5105
- Foam-inhibited
- Meets automotive-manufacturer requirements

Container
5 l, 10 l, 200 l, 750 l

50 - 100 ml / 10 l water | 50 - 200 ml / 10 l water | 100 - 1000 ml / 10 l water | 1 : 5 to 1 : 10 with water

Alkaline intensive cleaner — pH 13

Perfekt G 440

For industrial applications e.g. workshop floors; industrial kitchens, gastronomy and food-processing industry; solvent-sensitive floors

Product advantages
- Outstanding cleaning effect on oil and greasy dirt
- Foam-inhibited
- Suitable for high-pressure cleaners
- RK and RE listed

Container
1 l, 5 l, 10 l, 200 l, 750 l

50 - 200 ml / 10 l water | 1 : 5 to 1 : 10 with water

Intensive floor cleaner, highly concentrated — pH 10

Maradin HC 43

For all water-resistant floor coatings such as rubber and PVC, as well as unpolished natural and artificial stones, clinker and earthenware slabs and surfaces; suitable for sports floor coatings; ideal for cleaning at completion of building works; also suitable for use on acrylic glass

Product advantages
- Outstanding cleaning power
- Including on structured floor coatings
- Highly efficient thanks to economical dosing
- Material-compatible
- Tested for sports flooring in accordance with FMPA DIN 18032/2

Container
1 l, 10 l

10 - 40 ml / 10 l water | 20 - 80 ml / 10 l water | 60 - 100 ml / 10 l water | 1 : 20 to 1 : 50 with water

Intensive industrial cleaner, highly alkaline — pH 13,5

Indumaster® Offensive IR 47

For use in industrial applications and workshop areas; all alkali-resistant floors and surfaces; epoxy resin coverings; tiles; ceramic and screed flooring

Product advantages
- Breaks down dirt
- Removes heavy rust, oily and greasy soil
- Dissolves the stubbornest of encrustations
- High dispersing properties
- Foam-inhibited

Container
10 l, 200 l

100 - 500 ml / 10 l water | 100 ml / 10 l water | 1000 ml / 10 l water | 1 : 5 to 1 : 10 with water

Stripper for wooden floors, solvent-based

Parquet Stripper G 400

For unsealed wooden floors and hard-wax-treated coverings such as parquet and cork

Product advantages
- Poredeep cleaning
- Spontaneous effect
- Economical dosage
- Thoroughly dissolves hard wax, oil and grease

Container
10 l

neat

Stripper, highly alkaline — pH 14

Total G 424

Alkali-resistant and water-resistant hard floor covering such as PVC, stone (unpolished), clinker and earthenware slabs

Product advantages
- Outstanding film-removing action
- Dissolves stubborn dirt
- For application in cleaning machines
- Foam-inhibited

Container
10 l

1 - 3 l /
10 l water

Highly alkaline and fast-acting stripper — pH 13,5

Total Extra G 426

For all alkali-resistant and water-resistant hard floor coverings e.g. PVC, clinker etc.; removal of high-speed compressed coatings

Product advantages
- Fast-acting problem solver
- Intensive film-removing action
- For mechanical application in scrubber driers
- Dissolves stubborn over-coatings
- Very good wetting properties and low slip hazard

Container
10 l

1 - 3 l /
10 l water

Highly concentrated universal stripper — pH 10,5

Radana HC 42

For water-resistant, alkaline-sensitive floor coverings such as linoleum, rubber, and limestone; also suitable for use on PVC, natural and artificial stone, clinker and earthenware slabs

Product advantages
- For universal use
- High level of film-removing action even with hard coatings
- Material-friendly due to weak alkaline formula
- Economical, easy dosage
- Very good wetting properties and low slip hazard
- Foam-inhibited, therefore also suitable for use in cleaning machines

Container
1 l

1 l /
10 l water

Universal stripper — pH 10,5

Corridor® Unic Ultra S 707

For water-resistant and alkali-sensitive floor coverings e.g. linoleum, rubber, PVC and limestone

Product advantages
- Powerful universal cleaner
- Outstanding film and dirt dissolving power
- Very good material compatibility
- Short reaction time to save time
- Easy to remove from the surface
- Removes the hardest coatings

Container
10 l

1 -3 l /
10 l water

High-performance universal stripper — pH 10

Corridor® Power Stripper S 708

For all water-resistant and alkali-sensitive elastic floor coverings such as linoleum, elastomer coverings and PVC; for removal of hard-to-remove, multi-coated metal-crosslinked and metal-salt-free coatings and floor finishes

Product advantages
- Outstanding dissolving action on encrustations and compressed floor finishes
- Fast-acting and residue-free dissolving of coatings
- Low dosage, very economical
- High material compatibility
- Foam-inhibited

Container
5 l

1 -3 l /
10 l water

Neutral dry stripper, ready-to-use — pH 8

Corridor® Dryex S 711

For coated and/or water-sensitive floor coverings e.g. parquet, cork, false floors, stairs; excellent in areas with adjacent water-susceptible floors

Product advantages
- Removes top polymer coating layer
- Suitable for targeted cleaning
- No neutralisation required
- Very economical – saves lots of time
- Material-friendly
- Slip-retardant
- Pleasant fragrance

Container
600 ml

neat

Mildly alkaline basic cleaner for the superficial stripping — pH 9

Corridor® Top Stripper S 715

For removing the top coating wear layer during top stripping-procedure; for preparation of coverings for initial and additional coats; for all waterproof floor coverings, including those that are alkalisensitive and elastic, as well as natural and artificial stone and sealed wood; suitable for the complete removal of layers of Corridor® Complete S 732

Product advantages
- A consistent look for floor covering after top stripping for preparation for additional coats or initial treatment of coverings
- Intensive cleaning and even removal of the top layer
- For mechanical intensive cleaning with a single-disc machine and cleaning machines
- No additional rinsing required
- Very economical
- Foam-inhibited
- Efficient surface layer removal for all common care dispersions on the market

Container
1 l, 5 l

500 - 1000 ml /
10 l water

Ecological universal stripper — pH 9,5

Planta® Multi Stripper P 321

For water-resistant and alkali-sensitive floor coverings e.g. linoleum, elastomer coverings and PVC; suitable for artificial and natural stone coverings

Product advantages
- Eco-certified
- Very good material compatibility
- Environmentally-friendly formulation with good dirt and film-removing action
- Acts quickly
- Perfect for use with Planta® Multi Gloss P 320

Container
5 l

1 - 3 l / 10 l water

Self-gloss emulsion — pH 9

Sunglorin G 145

For coatable and water-resistant floor coverings e.g. sealed parquet, linoleum, PVC and rubber; natural and artificial stone

Product advantages
- Suitable for wiping care
- Easy to remove
- Polishable with single-disc machine
- Good dispersive capacity
- Slip-resistant pursuant to DIN 51131
- Suitable for cleaners

Container
1 l, 10 l

100 - 200 ml / 10 l water | neat | 1 : 1 with water

Liquid floor wax

Buzilin G 320

For unsealed wooden floors; untreated and hard-wax-treated floors e.g. cork, parquet

Product advantages
- Produces a resistant protective film on the floor
- Cleans and cares
- Polishable
- Suitable for cleaners
- Free from typical solvent odour
- Slip-resistant pursuant to DIN 51131

Container
10 l

neat

Full care for stone floors — pH 9

Roca Dispers R 200

For stone floors of natural and concrete stones

Product advantages
- Very good dispersive capacity
- Leaves a shiny, hard-wearing protective film
- Very good filling properties
- Easier daily routine cleaning after application by formation a closed surface
- Protects against soiling and heel marks
- Ensures good traction resistance, tested according to DIN 51131
- Enables smooth restoration
- Suitable for cleaners

Container
10 l

100 - 200 ml / 10 l water | 1 : 1 with water | neat

Pore filler and primer — pH 8

Corridor® Basic S 720

For open-pore and absorbent floor coverings e.g. concrete, cement and magnesite screed; especially suitable for old and damaged, as well as several times basic cleaned linoleum floor coverings

Product advantages
- Preserves value for longer, enhances colours
- Gets deep into pores
- Protects against dirt deposits and is water-vapour-permeable
- Resistant to alcohol and disinfectant
- Cannot be chemically dissolved
- Dust-binding

Container
10 l

neat to 1 : 1

Multi-purpose emulsion, glossy — pH 8,5

Corridor® Complete S 732

For use in public institutions, social education establishments and on administrative premises; for floor coverings such as PVC, rubber, linoleum, stone, sealed parquet and cork

Product advantages
- Very good dispersive capacity
- Quick-drying
- Enables smooth restoration
- Suitable for coating repair
- Can be used as wiping care
- Suitable for cleaners
- Polishable using a high-speed machine
- Slip-resistant pursuant to DIN 51131

Container
1 l, 5 l

150 ml / 10 l water | 1 : 1 with water | neat

Allround self-gloss dispersion — pH 7,5

Corridor® Glorin S 734

For use in healthcare facilities such as nursing homes, hospitals and areas where disinfectant is used; for coatable and water-resistant floor coverings e.g. PVC, linoleum and rubber; coatable PUR-tempered coverings

Product advantages
- Resistant high-gloss dispersion
- Resistant to surface disinfectant
- Free of metal salt
- Very good filling properties and good dispersion
- Polishable using a high-speed machine
- Slip-resistant pursuant to DIN 51131

Container
5 l, 10 l

neat

Dispersion, matt — pH 7,5

Corridor® Matt S 737

For use in healthcare facilities such as care homes and hospitals; sports halls; for water-resistant floor coverings e.g. PVC, linoleum and rubber

Product advantages
- Silky matt look
- Resistant to surface disinfectant
- Certified according to FMPA DIN 18032/2 for sports floors
- Slip-retardant pursuant to DIN 51131
- Free of metal salt

Container
10 l

neat

Black dispersion — pH 7,5

Corridor® Black S 739

For water-resistant (also residual moisture) and coatable floor coverings such as bitumen, asphalt, stone, concrete and cement screed, as well as PVC coverings without PUR treatment; dark floor coverings

Product advantages
- High-intensity protective film
- High filling properties
- High coverage properties
- Very good dispersive capacity
- Free of metal salt
- Slip-resistant in accordance with DIN 51131
- High durability
- Matt, gloss, or highly glossed sealing possible through the final coating

Container
10 l

neat

High-performance dispersion — pH 7

Corridor® Jewel S 741

For all elastic coatable (also residual damp) and water-resistant floor coverings such as linoleum, rubber and elastomer coverings; for heavily frequented floor coverings e.g. in schools, hospitals, care homes and areas when disinfectant is used; coatable epoxy resin floor coverings; coatable PUR-tempered coverings

Product advantages
- Extremely durable
- Excellent coverage and ultimate shine
- Low dirt adhesion due to fast-clean surface
- Very good resistance to most hand and surface disinfectants
- Polishable using a high-speed machine
- Slip-resistant pursuant to DIN 51131
- Easily removed with Corridor® Power Stripper S 708

Container
5 l

neat

Ecological dispersion, glossy — pH 8,5

Planta® Multi Gloss P 320

For use in care and nursing homes, schools, nursery schools and health care facilities; for coatable and water-resistant floor coverings e.g. PVC, linoleum and elastomer coverings; coatable PUR-tempered coverings; natural stone and artificial stone

Product advantages
- Eco-certified
- Hard-wearing, environmentally-friendly formulation
- Free of metal salt
- Very good filling properties and good dispersion
- Resistant to surface disinfectant
- Polishable using a high-speed machine
- Suitable for coating repair
- Slip-resistant pursuant to DIN 51131
- Perfect for use with Planta® Multi Stripper P 321

Container
5 l

neat

Ready-to-use crystalliser — pH 2

Roca Clarin R 180

Smooth, calciferous floor coverings e.g. marble, travertine, Solnhofen limestone, Jurassic limestone, terrazzo

Product advantages
- Removes minor scratches and chemical burns
- Enhances the optical appearance and provides long-lasting lustre
- No long drying times required after basic cleaning
- Increases protection and floor resistance

Container
600 ml

neat

Ready-to-use spray cleaner and restorer — pH 9

Corridor® Spray S 770

For coating repair of coated and uncoated floor coverings; restoration of walkways e.g. linoleum, rubber, sealed parquet, PVC, natural stone and artificial stone

Product advantages
- Good filling properties
- Smooth restoration through high level of care
- Ideal for application with a single-disc machine or high-speed machine
- Suitable for targeted cleaning

Container
600 ml

neat

EASY WITH BUZIL

NEW ONLINE SERVICES MAKE THE WORKING DAY EASIER

Which product is best suitable to which cleaning task? And what is the quickest, most convenient way to order these products? Our new and versatile range of online services provide the answers to these and other important questions you may have.

The BUZIL cleaning advisor provides valuable information on a huge variety of materials and types of soiling. And in the BUZIL Product Finder you can enter specific parameters like application, cleaning performance or product features to find what you're looking for directly. You can easily search for products and content from anywhere using a computer, smartphone or tablet, and the structured search result lists and auto-complete make it really simple to use.

Our practice-oriented range of online services also includes a comprehensive download and service area with technical and security-related documents, cleaning and care recommendations, tips and tricks, method cards, user videos and much more. In short, here you can find everything you need for successful, time-saving cleaning in almost any area.

The MyBuzil professional shop is available to business customers 24 hours a day for orders on the go or from your desk. Simply log in or register at shop.buzil.de/en/account to enjoy the many benefits of the MyBuzil shop!

EFFICIENT, SAFE AND FAST. INDUSTRIAL BUILDING AND SYSTEM CLEANING WITH INDUMASTER®.

Whether you're dealing with oil and grease or specific types of soiling like glue, graphite, resin, rubber residue, scuff marks or forklift truck marks, you'll need dirt-dissolving power that takes effect quickly and reliably. Applications range from cleaning and care of industrial floor coverings and interior spaces such as ceilings and walls, a very wide range of metal and plastic surfaces as well as industrial glazing, to the cleaning, maintenance and care of production machines. Equally important are the product's short drying period, low levels of foam formation when used in cleaning machines, corrosion protection, environmental tolerability and its suitability for oil and grease separators (quick separation) in compliance with the Austrian standard ÖNORM. Ensuring exemplary compliance in hygiene procedures is particularly important in the food industry. Buzil has many years of experience and outstanding expertise in industrial and building cleaning, making it the right partner for these demands, all of which can be successfully handled using INDUMASTER® industrial cleaners.

DISINFECTION

YOU'RE IN SAFE HANDS WITH US WHEN IT COMES TO DISINFECTION TOO

From routine disinfection of surfaces to regulatory decontamination actions, Buzil has over 100 years of experience in development, production and marketing in the field of professional building and industrial cleaning, meaning peace of mind for you.

The performance of our highly efficient Budenat® disinfectant products is verified by independent institutions as well as by recognised German and international listings and assessments such as VAH, DVG, IHO, RKI and EN standards.

We also offer expert consultation and an established training and seminar programme. Moreover, Buzil will support you in creating personalised cleaning and disinfection schedules to meet statutory requirements. Our 24-hour emergency hotline and comprehensive Buzil online service furthermore ensure that you can access fast and reliable information at any time of day.

Liquid concentrate for surface disinfection

pH 3,5

Budenat® Acute D 441

For disinfection in the event of an epidemic in accordance with IfSG (for illnesses which must be reported)

Product advantages
- Problem-solver in the event of an epidemic
- RKI-listed (sphere of action: AB)

Effectiveness
- Bacteria incl. MRSA, TBC and sporulating organisms, yeasts, enveloping viruses as well as the non-enveloping viruses adeno, noro, polio, polyoma and parvo viruses (virucide)
- Tested to European standards EN13697, EN13704, EN14476, EN14348

Dosage/Exposure time
- According to RKI list: 7.0% - 240 min.
- Routine disinfection according to VAH: 2.0% - 15 min.
- Dosing according to EN standards, please see technical data sheets

Container
- Dispensing bottle 1 liter

Highly efficient disinfectant cleaner

pH 10

Budenat® Intense D 443

For water-resistant surfaces and floor coverings; ideal for use in care and nursing homes, schools, nursery schools, hospitals as well as kitchens and food preparation areas; can be used in all wet areas, sanitary facilities and for swimming pool cleaning

Product advantages
- Cleaning and disinfection in one step
- Low dosage
- Acts quickly
- Even with high bacterial load
- VAH- and IHO-listed
- Aldehyde-free / QAV-free
- Broad spectrum of activity

Effectiveness
- Bacteria incl. MRSA and TBC, yeasts, enveloped viruses (limited antiviral properties)
- Tested to European standards EN13697, EN14348, EN14476

Dosage/Exposure time
- Bactericides and levurocidal routine disinfection according to VAH: 1.0% - 15 min. / 0.5% - 30 min. / 0.25% - 240 min.
- TBC: 1.0% - 60 min.
- Dosing according to EN standards, please see technical data sheets

Container
- 1 l, 10 l

Ready-to-use alcoholic rapid disinfectant

pH 7

Budenat® Rapid D 444

For use in the food industry, in kitchens and health care; for all alcohol-resistant surfaces and materials

Product advantages
- Residue-free, thus no coating formed after application
- No wiping down or rinsing off necessary
- Acts quickly
- Ready-to-use
- Non-scented
- VAH- and IHO-listed

Effectiveness
- Bacteria incl. MRSA and TBC, yeasts, enveloped viruses (virucide to a limited extent) as well as the non-enveloped viruses noro viruses and rota viruses
- Tested to European standards EN13697, EN14348, EN14476

Dosage/Exposure time
- Bactericides and levurocidal routine disinfection: Pure - 1 min.
- Noroviruses: Pure - 1 min.
- Dosing according to EN standards, please see technical data sheets

Container
- 1 l

Notice: Please see page 41 for more information of used listings and standards.

Alcoholic wipes for fast disinfection

pH 7

Budenat® Rapid Wipes D 444

For use in the food industry, in kitchens and health care; for all alcohol-resistant surfaces and materials

Product advantages
- Ready-to-use wipes, on hand at all times
- Residue-free, thus no coating formed after application
- No wiping down or rinsing off necessary
- Acts quickly
- Non-scented
- Impregnating fluid VAH- and IHO-listed

Effectiveness
- Bacteria incl. MRSA and TBC, yeasts, enveloped viruses (virucide to a limited extent) as well as the non-enveloped viruses noro viruses and rota viruses
- Tested to European standards EN13697, EN14348, EN14476

Dosage/Exposure time
- Bactericides and levurocidal routine disinfection: Pure - 1 min.
- Noroviruses: Pure - 1 min.
- Dosing according to EN standards, please see technical data sheets

Container
- box with 120 pieces, refill pack with 120 pieces

High-alkaline disinfectant cleaner

pH 13

Budenat® Alkasept D 445

Ideal for use in food preparation areas; for all alkali-resistant surfaces and floors

Product advantages
- Cleaning and disinfection in one step
- Powerful oil and grease-dissolving power
- VAH- and IHO-listed

Effectiveness
- Bacteria incl. MRSA and sporulating organisms, yeasts, fungi, enveloped viruses and non-enveloped viruses (virucide)
- Tested to European standards EN13697, EN13704, EN14476

Dosage/Exposure time
- Bactericides and levurocidal routine disinfection after VAH: 2.0% - 15 min.
- Noroviruses: 4.0% - 30 min.
- Dosing according to EN standards, please see technical data sheets

Container
- 1 l, 10 l

Neutral disinfectant

pH 8

Budenat® LM D 447

Ideal for use in kitchens, food preparation areas, care and nursing homes, fitness and wellness studios, schools, nursery schools and health care facilities; for all wet areas, sanitary facilities and for swimming pools as well as for sunbeds and fitness equipment; for all water-resistant materials, surfaces and floors

Product advantages
- Cleaning and disinfection in one step
- For sensitive surfaces
- pH-neutral, gentle on materials
- Aldehyde-free
- Particularly suitable for use on acrylic glass
- VAH- and IHO-listed

Effectiveness
- Bacteria incl. MRSA, yeasts, enveloped viruses (virucide to a limited extent) as well as the non-enveloped viruses noro viruses and rota viruses
- Tested to European standards EN13697, EN14476

Dosage/Exposure time
- Bactericides and levurocidal routine disinfection: 2.0% - 15 min.
- Bactericides and levurocidal rapid disinfection: 7.5% - 1 min.
- Noroviruses: 6.0% - 30 min.
- Dosing according to EN standards, please see technical data sheets

Container
- 1 l, 10 l

Acid disinfectant cleaner

pH 0 - 0,5

Budenat® Azid Plus D 587

For all sanitary-, wet-room- and swimming pool areas, as well as for all areas where the combination of disinfection and limescale removal is required; can be used on all acid-resistant materials, floors and surfaces, such as urinals, toilets, washbasins and tiles

Product advantages
- Effective disinfection and limescale removal in a single process
- Extremely effective disinfectant without long waiting times
- VAH- and RK-listed
- Easily dissolves limescale, urine scale, dirt and soap residues

Effectiveness
- Bacteria incl. MRSA and yeasts

Dosage/Exposure time
- Routine disinfection according to VAH: 5.0% - 15 min.

Container
- 1 l, 5 l

Ready-to-use alcoholic hand disinfectant

pH 8

Budenat® Protect Hand D 807

Hygienic hand disinfection; disinfection of skin rich in sebaceous glands

Product advantages
- Alcoholic, non-scented disinfectant
- VAH-listed
- Dermatologically recommended for persons with allergies and other sensitive persons
- Without accumulated long-term effects, thus very skin-compatible

Effectiveness
- Bacteria incl. MRSA and TBC, yeasts, enveloped viruses (virucide to a limited extent) as well as the non-enveloped viruses noro viruses and rota viruses
- Tested to European standards EN1500, EN14476

Dosage/Exposure time
- Pure - 30 sec.
- Dosing according to EN standards, please see technical data sheets

Container
- 150 ml bottle, 500 ml Euro dispenser bottle, 1 liter Euro dispenser bottle

Notice: Use biocides safely. Always read the label and product information before use.

Commonly used listings and standards

VAH-List:
A list of disinfectants issued by the Disinfectants Commission in the Association for Applied Hygiene (VAH) in collaboration with the scientific societies and professional associations DGHM, DGKH, GHUP and BVÖGD tested according to the DGHM Standard Methods for Testing Chemical Disinfection Processes. To check chemical disinfection procedures, processes that have been tested and deemed to be effective for prophylactic disinfection and hygienic handwashing in all medical and non-medical environments (e.g. public institutions) are used.

IHO-List:
The IHO (Industrial Association for Hygiene and Surface Protection) is an association of companies in the field of cleaning, disinfection and care solutions for professional applications. The IHO List contains antiseptic disinfectants for hands, surfaces and instruments. The list is a compilation of effective disinfectants for use in the fields of food production and processing and also in the veterinary sector. The entries on the effectiveness of products rely on tests according to European standards.

RKI-List:
List of the Robert Koch Institute tested and approved disinfectants and disinfection procedures used for officially ordered decontaminations in accordance with Art. 18 IfSG (Federal Law on the Prevention of Infectious Diseases in Humans). These have been tested for their efficacy, and for their safety with respect to human health and the environment by the BfArM (Federal Institute for Drugs and Medical Devices) and UBA (German Federal Environmental Agency).

European Norms:
The European Norms (EN) quoted in Buzil disinfection product descriptions are European standards for testing disinfectants. The test methods are very much geared to practice and allow a comparison of disinfectants in Europe.

KITCHEN

SENSITIVE ENVIRONMENT. SAFE SOLUTIONS.

Kitchens and food facilities are among the biggest challenges for providers of professional cleaning solutions. After all, these areas are used to process as well as store food. Whether it's interim cleaning, end-of-day cleaning, basic cleaning or disinfection – meeting the stringent hygiene standards that apply to this sector will probably require special cleaning agents.

Other challenges that make achieving a satisfactory result that little bit harder include high temperatures, excessive moisture and stubborn stains such as oil and grease, burnt food residue, dried egg white or residue from grilling, baking and frying. In addition, the cleaning agents used have to be suitable for the materials in question, whether it's plastic, glass, anti-skid surfaces, chrome or stainless steel.

But even when it comes to these sensitive issues, Buzil always has the right cleaning solution in accordance with HACCP standards: from maintenance and intensive cleaners for floors and surfaces to cleaning agents for automatic dishwashers, cream cleansers, descaling agents and oven cleaners, whether ready-to-use, highly concentrated or certified environmentally friendly. And of course we will be happy to help you create cleaning and disinfection schedules in accordance with legal requirements.

Daily routine cleaning Intensive cleaning

Ready-to-use metal polish — pH 9,5

Metapol G 505

Suitable for use in the food industry; for tarnished surfaces and materials; especially suitable for brass, aluminum, bronze and copper; can be used on chrome, anodized, stainless steel, glass, ceramic and ceramic hobs

Product advantages
- Intensive deep cleaning power
- Material-friendly
- Good skin compatibility
- Produces a beading effect on the treated surface
- Pleasant fragrance

Container
600 ml, 200 l

neat

Ready-to-use stainless-steel cleaner — pH 3

Buz® Metasoft G 507

Suitable for use in the food industry; acid-resistant surfaces; stainless steel; ceramic hobs; ceramic tiles and porcelain surfaces

Product advantages
- Removes tarnishing from stainless-steel surfaces and appliances
- Produces a beading effect
- Also removes stubborn encrusted dirt
- Excellent limescale-dissolving power, even on extreme dirt

Container
600 ml, 200 l

neat

Ready-to-use cream cleaner, viscous — pH 9

Buz® Polish G 508

Suitable for use in the food industry; metal; ceramic; tiles

Product advantages
- Effortlessly removes burnt-on food
- Dissolves excessive dirt on surfaces and materials
- Powerful cleaning effect
- Kind to skin with pleasant fragrance

Container
600 ml

neat

Washing-up liquid, neutral — pH 6

Buz® Dish Fix G 530

Ideal suitable for use in the food industry; for water-resistant surfaces and materials; dishes, glasses, cutlery

Product advantages
- Good grease-dissolving power
- Highly foaming
- Dries quickly without streaks, without towelling dry
- Material-friendly
- Kind to skin
- Clinically tested with a pleasant fragrance

Container
1 l, 10 l

20 - 40 ml /
10 l water

Kitchen-industrial cleaner, phosphate-free — pH 12

Indumaster® Intensive IR 44

For use in the food industry, workshops and industrial applications; for all alkali-resistant floors and surfaces

Product advantages
- Intensive soil-removing action
- Dissolves excessive dirt from animal and vegetable oil and grease
- Declaration of clearance for the food industry

Container
10 l, 200 l, 750 l

100 - 200 ml / 10 l water	500 - 1000 ml / 10 l water	200 - 500 ml / 10 l water	1 : 5 to 1 : 10 with water

Ecological washing-up liquid, neutral — pH 7

Planta® Aloe P 314

Ideal for use in the food industry; for water-resistant surfaces and materials e.g. dishes, glasses, cutlery

Product advantages
- Eco-certified
- Especially good grease-dissolving power
- Suitable for dishwashing by hand
- Highly foaming
- Dries quickly without streaks, without towelling dry
- Fragrance-free

Container
1 l, 10 l

10 - 20 ml / 10 l water

Kitchen-intensive cleaner — pH 13

Bistro G 435

For gastronomy and industrial kitchens; food-processing industry; for alkali-resistant surfaces and floors

Product advantages
- Outstanding removal of albuminous, oily and greasy dirt
- Stable foam structure
- Suitable for use in foam guns
- Fast-separating according to standard ÖNORM B 5105
- RK and RE listed

Container
1 l, 5 l, 10 l, 200 l

20 - 1000 ml / 10 l water	1 : 5 to 1 : 10 with water

Grill & oven cleaner, highly alkaline — pH 14

Buz® Grillmaster G 575 / Buz® Grillmaster G 576

For use in the gastronomy and industrial kitchens; for alkali-resistant ovens, grills and convection ovens

Container G 575
10 l

Container G 576
600 ml

Product advantages
- Automatic action with high fat-emulsifying capabilities
- Spontaneous dissolving on burnt-on dirt
- Removes excessive encrusted grease, oil and albumen, as well as residue from grilling, baking and roasting
- Fragrance-free
- Declaration of clearance for the food industry
- G 576 is also especially suitable for foam application on vertical surfaces

250 - 1000 ml / 10 l water	1 : 3 to 1 : 5 with water	neat

Glass-cleaning and dishwashing liquid, alkaline — pH 14

Vamat GF DW 25

For use in the food industry; restaurants, hotels, industrial kitchens; especially suited to undecorated glasses as well as china, stainless steel, plastic and cutlery

Product advantages
- Suitable for machine cleaning of glasses and dishes in all commercial dishwashers
- Perfectly suited for hard water
- Highly effective for removing dried tea and coffee residues and lipstick on glasses and china
- Glass-protecting and material-friendly
- High concentrate, therefore low dosage and highly economical

Container
12 kg

0,5 - 3 ml /
1 l water

Dishwashing liquid, highly alkaline — pH 14

Vamat GH DW 30

For use in the food industry e.g. in bakeries, butchers, restaurants and industrial kitchens; especially suited to china, glassware, plastic, stainless steel and cutlery

Product advantages
- Suitable for machine cleaning in all commercial dishwashers
- Especially for soft water
- Excellent grease-emulsifying power
- Removes dried food residues
- Prevents the build-up of stark deposits
- High concentrate, therefore low dosage and highly economical

Container
12 kg

1 - 3 ml /
1 l water

Rinser, acidic — pH 2

Vamat KS DW 40

For use in the food industry e.g. in bakeries, butchers, restaurants and industrial kitchens; also suitable for handling cases and trays; especially suited to china, glassware and cutlery

Product advantages
- Suitable for machine rinsing in all commercial dishwashers
- For universal use
- Very good pearling off effect, therefore dries streak-free and stain-free
- Excellent wetting of dishes
- Highly material-friendly
- Especially for hard water
- High concentrate, therefore low dosage and highly economical

Container
10 l

0,05 - 0,4 ml /
1 l water

DETERGENT

NOW EVEN MORE EFFICIENCY AND SERVICE FOR YOUR TEXTILE LAUNDRY

With Buz® Laundry you are getting the perfect product family for the professional cleaning of mop covers, cloths, bed and table linen, working clothes and towels. The whole Buz® Laundry product series has been designed as a modular system. This allows the washing performance to be adapted to specific requirements in industrial applications. The liquid application permits exact dosing of the products and allows them to develop their tried-and-trusted cleaning action even at low temperatures.

This way our laundry detergents offer you squeaky clean economic advantages: Thanks to optimized dosing, you now use 20% less detergent with Buz® Laundry Compact and Buz® Laundry Enz 3. The cleaning result is still as convincing as before – thanks to new measuring methods developed for the precise determination of cleaning performance.

Our Laundry service package, including planning, installation and support, is available for individual tailor-made dosing solutions. In practice, this means that following an inspection of your premises by one of our sales representatives, we will prepare an individual offer, which is exactly meeting your requirements. A qualified technician will assemble, install and set the system to ensure optimum efficiency. The Buzil service package is rounded off by a wide range of support services such as the regular maintenance service, 24-hour hotline and a fast breakdown response service.

Highly concentrated liquid detergent

pH 14

Buz® Laundry Compact L 810

Heavy-duty detergent for commercial use; for following types of fabric: cotton, polyester, microfibre, viscose, polyamide, polypropylene; for all washing temperatures and for all water hardness ranges

Product advantages
- Efficient and powerful surfactant system for optimum dirt removal
- Optimum lime binding capacity due to special chelating agents
- Optical brighteners create perfect whiteness
- Excellent dirt holding capacity so detached dirt does not build up on the fibres
- Protects against greying
- Effortlessly removes stains such as street grime, soot, grease and oil, urine, etc.

Application and dosage
For manual and automatic dosing Buz® Laundry Compact L 810 is added to the main wash in the recommended dosage shown below:

hardness range	mmol / L	°dH	ml / kg (dry laundry)
soft	up to 1,3	up to 7,3	10-15
average	1,3-2,5	7,3-14	10-20
hard	2,5-3,8	14-21,3	15-25
very hard	over 3,8	over 21,3	20-30

Container
- 2 l, 10 l, 20 l

Concentrated enzyme liquid detergent

pH 8

Buz® Laundry Enz 3 L 820

Liquid detergent for comercial use; suitable for all types of fabric; especially for low washing temperatures; for all water hardness ranges

Product advantages
- Special combination of enzymes to remove all biological stains, such as protein, starch or grease
- Powerful surfactant system for optimum dirt removal
- Optimum effect due to special chelating agents
- Optical brighteners guarantee perfect whiteness
- Excellent dirt holding capacity so detached dirt does not build up on the fibres
- Protects against greying
- Especially kind to fabrics

Application and dosage
For manual and automatic dosing Buz® Laundry Enz 3 L 820 is added to the main wash in the recommended dosage shown below:

hardness range	mmol / L	°dH	ml / kg (dry laundry)
soft	up to 1,3	up to 7,3	10-15
average	1,3-2,5	7,3-14	10-20
hard	2,5-3,8	14-21,3	15-25
very hard	over 3,8	over 21,3	20-30

Container
- 2 l, 10 l, 20 l

Fabric softener

pH 3,5

Buz® Laundry Soft L 830

Fabric softener for commercial use; for softening all suitable textiles; not suitable for functional textiles and microfibre; for all water hardness ranges

Product advantages
- Cuts costs by optimising the iron and mangle properties of the textiles
- Improves the feel of the textiles
- Anti-static effect on synthetic fibres
- Makes laundry soft and fragrant

Application and dosage
For manual and automatic dosing Buz® Laundry Soft L 830 is added to the final rinse in the recommended dosage shown below:

2-5 ml/kg dry laundry (depending on the water hardness)

Container
- 10 l

Liquid detergent booster

pH 14

Buz® Laundry Strong L 831

Detergent booster for commercial use; for the following types of fabric: cotton, polyester, microfibre, viscose, polyamide, polypropylene; for all washing temperatures and for all water hardness ranges

Product advantages
- Optimum dirt removal capacity due to special chelating agents
- Clearly prevents detached dirt building up again on the fibres
- Improves the dirt holding capacity
- Special protection against greying

Application and dosage
For manual and automatic dosing Buz® Laundry Strong L 831 is added to the main wash in the recommended dosage shown below:

5-20 ml/kg dry laundry
(depending on the water hardness and level of soiling)

Container
- 2 l, 20 l

Liquid bleaching and disinfecting additive

pH 2

Buz® Laundry Bright L 832

Thermochemical laundry disinfection for comercial use; for disinfection of all white and colored, alkaliresistant and bleachable textiles; not suitable for wool and polyamide or for washing laundry severely stained with blood

Product advantages
- Laundry disinfectant with excellent bleaching effect
- Fibre-friendly oxygen bleach
- Makes laundry dazzlingly clean and hygienic
- RKI- (scope: AB) and VAH-listed washing process in combination with Buz® Laundry Compact L 810

Notice
Use biocides safely. Always read the label and product information before use.

Application and dosage
For manual and automatic dosing Buz® Laundry Bright L 832 is added to the main wash in the recommended dosage shown below:

Bleaching laundry: 2-5 ml / kg

Chemo-thermal disinfection:

	ml / kg	float	Disinf.-Temp.	Exposure time
L 810 L 832	10-30 10	1:5	60° C	10 min.

Container
- 20 kg

SPECIAL

SPECIAL REQUIREMENTS? NOT A PROBLEM.

Buzil's portfolio comprises more than 130 products, every single one of them the result of invaluable expertise and decades of experience. This means we can help our customers to meet almost any challenge.

Thanks to our special cleaning agents, Buzil has been able to make a name for itself as a sought-after development partner and well-respected problem solver. Problem surfaces? Sensitive materials? We always like a challenge – the tougher, the better. That's why the Buzil „arsenal" of special cleaning agents comprises a wide range of innovative solutions that have been developed and designed for specific applications – from porcelain stoneware tiles and carpet cleaners to odour eliminators, air fresheners, stone impregnation and defoaming agents for machines, stain removers and pipe and industrial cleaners to purpose-made hand-wash lotions.

So you have another exciting challenge for us? Please contact us, and we will be happy to discuss your requirements in detail!

Daily routine cleaning Intensive cleaning Basic cleaning

Intensive cleaner for porcelain stoneware tiles, alkaline — pH 12,5

Erol® G 490

For microporous, fine-rough and alkaline-resistant surfaces, porcelain stoneware tiles and safety tiles

Product advantages
- Spontaneous dirt dissolving power with poredeep cleaning effect
- Excellent wetting properties
- Foam-inhibited
- A perfect cleaning performance will be achieved in combination with Erolcid® G 491
- RK listed

Container
1 l, 5 l, 10 l, 200 l

50 - 100 ml / 10 l water | 500 - 3000 ml / 10 l water | 100 - 200 ml / 10 l water

Intensive cleaner for porcelain stoneware tiles, acidic — pH 0,5

Erolcid® G 491

For microporous, fine-rough, acid-resistant surfaces; porcelain stoneware tiles and safety tiles

Product advantages
- Special phosphoric acid-based cleaner with fresh citrus scent
- Spontaneous, powerful removal of limescale deposits, rust and cement residue
- A perfect cleaning performance will be achieved in combination with Erol® G 490
- RK listed

Container
1 l, 5 l, 10 l

100 - 1000 ml / 10 l water | 200 - 1000 ml / 10 l water | 200 - 500 ml / 10 l water

Surfactant-free cleaner for porcelain stoneware tiles, acidic — pH 2,5

O Tens Azid G 501

For microporous, fine-rough and acid-resistant floor coverings, surfaces and materials e.g. porcelain stoneware tiles and safety tiles

Product advantages
- Residue-free removal of limescale deposits
- Residue-free cleaning with low repeat soiling potential
- Ideal for cleaning with microfibre fabrics
- Foam-inhibited
- Odourless
- Perfect for alternating use with O Tens G 500

Container
1 l, 10 l

20 - 100 ml / 10 l water | 50 - 100 ml / 10 l water

Carpet shampoo

pH 7

Optiflor® G 470

For water-resistant, colour-fast textile coverings and upholstery made from natural fibres and synthetic materials

Product advantages
- Dissolves dirt, fibre-deep and fabric-protective action
- Forms a dry, solid foam
- Crystallises dry
- Suitable for wet and dry shampooing
- Easy to remove and vacuum
- Does not contain optical brightening agents

Container
10 l

1 - 1,5 l / 10 l water

600 - 1000 ml / 10 l water

Carpet basic-cleaner, spray extraction

pH 7

Optiflor® Ex G 477

For water-resistant, colourfast textile coverings and upholstery made from natural fibres and synthetic materials

Product advantages
- Dissolves dirt, fibre-deep and fabric-protective action
- Prevents rapid re-soiling
- Foam-inhibited
- Does not contain optical brightening agents

Container
1 l, 10 l

100 - 1000 ml / 10 l water

1 : 6 with water

Defoamer for machines

pH 7

Buz® Defoam G 478

For dirty-water tanks on wet vacuum cleaners, cleaning machines and spray extraction equipment; for all equipment types

Product advantages
- Foam reduction and prevention
- Causes the foam to spontaneously break down and prevents foam formation
- Economical to use

Container
1 l, 10 l, 200 l, 750 l

1 to 5 %

Stain remover for textile coverings and surfaces

Buz® Point G 502

For stain removal on all solvent-resistant and colourfast textile surfaces, carpets and upholstery

Product advantages
- Problem solver with good cleaning effect
- Removes water-insoluble soil e.g. chewing gum, shoe polish and adhesives, varnish, tar and bitumen, felt-tip pen, ballpointpen, copy and stamp dye, ink and candle wax, oils and fats
- Easily removes stubborn residues of labels
- Leaves no residues
- Stain-removing power based on natural raw materials
- Economical to use
- Pleasant fragrance

Container
200 ml

neat

Solvent-borne stone impregnating

Roca Pregno R 100

For impregnation of open-pore and absorbent indoor stone surfaces; also for use on polished and precision-ground stone coverings such as granite, gneis, gabbro, limestone and terrazzo

Product advantages
- Long-lasting stain protection
- Offers protection against aqueous dirt as well as oil and grease
- Makes daily routine cleaning even simpler with the easy-to-clean effect
- Excellent depth of penetration, no change in the appearance of floor
- UV resistant

Container
1 l, 10 l

neat

Liquid pipe cleaner — pH 14

Buz® Flow G 577

Removes blockages in drains, pipes, siphons in washbasins, showers

Product advantages
- Highly effective, self-acting drain and pipe cleaner
- Power breakdown of blockages caused by soap residue, grease, hair and traces of food
- Slightly viscous for enhanced performance

Container
1 l

neat

Ready-to-use active odour blocker — pH 7,5

Buz® Fresh Magic G 567

For fast and long-lasting odour elimination and deodorising the air in sanitary and toilet facilities, smoking rooms, changing rooms, sports and spa areas, hospitals, care homes and gastronomy

Product advantages
- Fresh, deodorising fragrance with active odour blocker
- Eliminates odours quickly
- Leaves no stain behind
- Environmentally friendly atomizer without propellant

Container
600 ml, 10 l

neat

Ready-to-use fragrant spray — pH 7

Buz® Fresh G 569

For deodorising the air in rooms such as changing rooms, sports facilities, toilets and in the gastronomy

Product advantages
- Leaves pleasant, long-lasting fresh fragrance with a hint of Moschus
- Eliminates unpleasant odors reliable
- Leaves no stain behind
- Environmentally friendly atomizer without propellant
- Suitable for air conditioning devices

Container
600 ml, 10 l

neat

Skin-friendly hand-wash lotion, liquid — pH 6,5

Rinax® Soft G 800

For hand washing for a normal level of dirt

Product advantages
- Skin-friendly and pore-deep cleaning
- Gentle to the skin even if used frequently
- pH-neutral
- Cleans with mild foam, especially for sensitive skin
- Pleasant fragrance

Container
1 l, 5 l, 200 l

1,5 - 2,6 ml

Cream hand wash — pH 6,5

Rinax® Clean H 830

For use in industrial and workshop environments, such as mechanical and tool construction, repair workshops, locksmiths'; for moderate industrial dirt

Product advantages
- Liquid hand sanitiser with natural environmentally-friendly scrubbing agents
- Scrubbing agents made from natural biodegradable grain (corncob meal)
- Cleans quickly and thoroughly while being gentle on the skin
- High proportion of skin-nourishing substances
- pH-value is adapted to the skin's natural acid mantle
- Solvent- and terpene-free
- Dermatologically tested

Container
2 l, 10 l

2 - 5 ml

Notice: Rinax® Top G 801 will expire at the end of the year 2019.
Alternative product: Rinax® Clean H 830

Ecological hand-wash lotion — pH 6,5

Planta® Lotion P 317

For hand washing for a normal level of dirt

Product advantages
- Eco-certified
- Skin-friendly and pore-deep cleaning
- Soap-free
- pH-neutral
- Cleans with mild foam
- Economical to use
- Special skin protection components prevent skin from drying out
- Pleasant fragrance

Container
1 l, 5 l

1,5 - 2,6 ml

Fingerprint-free, universal skin protection lotion

Rinax® Skinguard Pro H 820

For use before work; protects skin against direct contact when working materials change, or when gloves are worn occasionally; for water-soluble and water-insoluble working materials and skin hazards which are not clearly defined; ideal for use in all fields that require comprehensive skin care

Product advantages
- Unscented, fingerprint-free, general-purpose skin protection cream
- Breathable and highly effective thanks to specific film-forming agents
- Absorbs into the skin quickly and leaves no fingerprints
- Forms a flexible, firm and invisible protective film
- Silicone-free
- Complies with requirements in accordance with the HACCP concept
- Dermatologically tested

Container
100 ml, 1000 ml

0,6 - 1,5 ml

Antiperspirant skin protection lotion to use with gloves

Rinax® Skinguard Glove H 821

For use before work; when wearing airtight protective clothing, such as gloves, boots and protective suits; ideal for use in all fields that require comprehensive skin care

Product advantages
- Unscented, viscous O/W emulsion
- Strengthens mechanical resistance of the upper callus layer
- Silicone-free
- Complies with requirements in accordance with the HACCP concept
- Dermatologically tested

Container
250 ml, 1000 ml

0,6 - 1,5 ml

Skincare cream with natural oils and beeswax

Rinax® Skincare H 822

For use after work and during breaks; care for skin under strain from work and the environment; suitable for use on hands and face; ideal for use in all fields that require comprehensive skin care

Product advantages
- Fragrance-free, slightly greasy, easy-to-absorb skincare cream with natural oils
- Protect and care for hands and faces also at rough and chapped skin
- Keeps skin healthy and strengthens its resistance when used regularly
- Silicone-free
- Complies with requirements in accordance with the HACCP concept
- Dermatologically tested

Container
100 ml, 1000 ml

0,6 - 1,5 ml

General-purpose dispenser

Rinax® Dispenser H 854

For skin protection, skin cleaning and skin care products H 820, H 821, H 822 and H 830 in 1000 ml and 2000 ml bag bottle

Product advantages
- Impact-resistant and hard-wearing, with glass fibre reinforced plastic
- Easy-to-install dispenser thanks to universal drilling pattern
- Large operating area, also suitable for elbow operation
- With push-fit system to regulate dispenser
- Container is easy to change

ECONOMICAL AND ENVIRONMENTALLY RESPONSIBLE CLEANING WITH PERFECT DOSING

DOSING SYSTEMS

It is only possible to achieve an economical, hygienic and ecologically optimal clean if a consistently precise concentration of cleaning product is used throughout the entire process. Buzil's dosing systems make it possible to precisely control usage of the products deployed and adjust these to perfectly suit the desired cleaning performance. The correct dosage saves money and protects the environment.

The compact and user-friendly design of the Buzil dosing systems also makes them easy to use while ensuring user safety, as employees' skin should not generally come into contact with the cleaning products.

From floors, surfaces, sanitary and wet areas to large kitchens and facilities in the food sector: Buzil dosing systems are versatile. As well as stationary dosing using central wall-mounted dosing systems which are combined with a water connection, a selection of various mobile dosing aids is also available.

Buzil dosing systems work according to the Venturi principle which ensures precise and reliable dosing. The inert components prevent limescale from forming in the dosing systems, meaning that little maintenance is required.

In Buzil dosing systems, an e-gap eductor with an elastomer cuff provides backflow protection. This means that the Buzil dosing systems meet the requirements of the DIN EN 1717 drinking water protection standard, class 4.

THE EFFICIENT ALL-IN-ONE SYSTEM FOR ENVIRONMENTALLY FRIENDLY CLEANING

Planta
EDITION

Low volume consumption, excellent results: Buzil's Planta® Edition does not only meet the highest cleaning performance standards, it also complies with the most restrictive European environmental standards.

From surfaces and floors over sanitary facilities and glass to hand-wash lotions, our user-friendly all-in-one system comprises sustainable cleaning solutions for all areas of application. Our clean & green solutions are the result of many years of experience: our focus has been on environmental issues for more than two decades. We use the insights gained from this research to continuously improve our entire product range – the Planta® Edition has even been awarded the EU Ecolabel and the Austrian Ecolabel.

Certified with the EU Ecolabel and the Austrian Ecolabel

EDITION PLANTA®

ULTIMATE SAFETY FOR THE MOST COMMON AREAS OF APPLICATION

Classic
EDITION

Always the right choice: Our Classic Edition brings together a selection of the most popular Buzil cleaners for your convenience. These „classic products“ have been in use successfully for many years and between them, they cover the full gamut of everyday standard applications.

From alkaline power cleaners, wiping care, to all-purpose cleaners, glass cleaners, hand dishwashing detergents or sanitary daily routine cleaners – the Classic Edition products make sure you are prepared for anything. They signify tried and tested quality you can rely on. Safe, fast and cost-efficient.
