A NEW ALL-ROUND COATING: An addition to the CORRIDOR® family

Buzil is complementing its range of coatings with the new CORRIDOR® COMPLETE S 732. This multi-purpose gloss emulsion, based on metal ion crosslinked polymers, is suitable for use on water-resistant floor coverings, such as PVC, rubber, linoleum, stone, sealed parquet, and cork. CORRIDOR® COMPLETE stands out through its ease of use, excellent dispersive capacity, short drying times, and also offers great value for money. The even and glossy protective film acts as a dirt repellent and its durability makes it suitable for high-speed polishing. S 732 can be used, amongst other things, for wipe care and is suitable for cleaners, repairing conditioning films, and smooth restoration. The all-rounder CORRIDOR® COMPLETE S 732 is available in 1 litre and 5 litre containers from 2 January 2017.
