

„Easy with Buzil!“ service concept METHOD CARDS FOR URGENT PROBLEM-SOLVING

The method cards support skilled employees in resolving acute problems simply, quickly and independently. This removes the need for a call to the foreman. The method cards not only provide information about correct dosage and the right material, but also about potential problems and how to solve them. Furthermore, the user can also find recom-

mendations for alternative products. The method cards come in a handy DIN A5 format and are laminated, making them moisture and dirt-resistant.

The method cards are available in the following languages: German; English; Croatian; Polish; Turkish

The cards are available for the following products:
