

PERFECTLY CLEAN - FOR SURE

PROPER
HAND DISINFECTION
in 6 steps

HAND DISINFECTION: PROTECT YOURSELF AND OTHERS ...

Give disinfectant into dry hands. Rub the hands strong up to the wrists with the disinfectant product for 30 seconds after the below procedures. Do the movements of each step five times. After completion of the sixth

step repeat the individual steps up to the specified application time. Make sure that the hands of the entire application time remain moist. Extract hand disinfectant again if required.

STEP 1

Palm to palm
Warning: Including wrist

STEP 2

Right palm over the left back of the hand and reversed

STEP 3

Palm to palm with crossed and spread fingers

STEP 4

Outside of fingers to facing palms with fingers crossed

STEP 5

Rub the right thumb circling in the closed left palm and reversed

STEP 6

Circling rubbing back and forth with closed fingertips of the right hand in left palm and reversed
