BITUMEN-TERRAZZO FLOORS

Bitumen-terrazzo is an innovative top layer, the look of which can be individually designed. It is a sanded, poured asphalt-finished screed pursuant to DIN 18560 "Floor screed in building construction". Poured asphalt consists of chippings (including coloured chippings made from broken natural rock, or even granulates made from metal and glass), sands and stone dust. Bitumen is the bonding agent, and gives the coverings their dark colours. Bitumen-terrazzo is highly sensitive to water-soluble and water-insoluble solvents; traditional deep cleaners corrode the bitumen and loosen it from the top layer, which then leads to light-coloured discolouration.

CLEANING

DEEP CLEANING

	Dirt	Treatment	Cleaning device
Pick up loose dirt, and remove any mortar, plaster residue, and colour stains manually using a scraper.	<p>ORGANIC/INORGANIC CONTAMINATION</p> <p>like protein, oil and grease or foodstuff residue e.g. coffee, red wine etc. can be removed using Perfekt G 440.</p> <p><i>PLEASE NOTE: Check the floor covering for colour-fastness before cleaning!</i></p>	Apply the cleaning solution evenly over the floor, and leave it to work for approximately 10 to 15 minutes.	
		Deep clean the covering using a single-disc machine and a red pad, or using a cleaning machine.	
		Pick up the loosened dirt using a wet vacuum cleaner, and rinse with water.	

INTENSIVE CLEANING

	Dirt	Treatment	Cleaning device
If necessary, pick up loose dirt.	<p>HEAVIER DIRT THAT IS ALKALINE-SOLUBLE</p> <p>like protein, oil and grease or foodstuff residue e.g. coffee, red wine etc. can be removed by intensive cleaning using Maradin HC 43 or Indumaster® Universal IR 55.</p>	Apply the cleaning solution evenly over the floor, and leave it to work for a short time.	
		Clean using a single-disc machine and a red pad.	
		Pick up the loosened dirt using a wet vacuum cleaner, and rinse with water.

DAILY ROUTINE CLEANING

	Dirt	Treatment	Cleaning device
Microfibre-based flat mops should be used to achieve optimum cleaning results.	ORGANIC/INORGANIC CONTAMINATION		
	like rust, protein, oil and grease or foodstuff residue e.g. coffee, red wine etc. Products with care elements, such as the Unibuz G 235, Planta® Clean P 315 and Corridor® Daily S 780 wipe care products based on water-soluble polymers, are well-suited to daily routine cleaning.	Apply the cleaning solution evenly over the floor, and leave it to work for approximately 10 to 15 minutes.	

CARE

INITIAL TREATMENT

Care	Treatment	Cleaning device
This floor covering can be initially treated with the Roca Dispers R 200	This full care agent for stone floors is applied evenly and in undiluted form, in 2-3 thin layers, and each individual layer must be left to dry completely.	
	Polishing is not required.
