## LINOLEUM FLOOR COVERINGS IN SPORTS AND MULTIPURPOSE HALLS, UNCOATED

Linoleum consists of natural materials. To produce it, linseed oil is blended with natural resins, wood and cork dust, inorganic fillers, and colour pigments. This mass is then but under pressure, and pressed onto a jute fabric. Linoleum is sensitive to alkaline cleaners and deep cleaners with a pH-value greater than 10, abrasive pads, and brushes.  
There are linoleum floors that exhibit discolouration or odours when treated just with clean water, or become so porous after deep cleaning that a drying time of at least 12-24 hours is necessary.

### CLEANING

#### DEEP CLEANING

	Dirt	Treatment	Cleaning device
Pick up loose dirt, and remove any mortar, plaster residue, and colour stains manually using a scraper.	<b>RESIDUE FROM CARE PRODUCTS</b>  in the form of coatings and care products can be removed using Corridor® Unic Ultra S 707, Corridor® Power Stripper S 708 or Planta® Multi Stripper P 321.	Apply the cleaning solution evenly over the floor, and leave it to work for approximately 10 to 15 minutes. <i>PLEASE NOTE: Do not allow the cleaning solution to dry.</i>	
		Deep clean the covering using a single-disc machine and a blue pad.	
		Pick up the loosened dirt using a wet vacuum cleaner, and rinse with water. <i>PLEASE NOTE: leave the floor to dry completely (up to 24 hours).</i>	

#### INTENSIVE CLEANING

	Dirt	Treatment	Cleaning device
Pick up loose dirt, and remove any mortar, plaster residue, and colour stains manually using a scraper.	<b>HEAVIER DIRT THAT IS ALKALINE-SOLUBLE</b>  like protein, oil and grease or foodstuff residue e.g. coffee, red wine etc. can be removed by intensive cleaning using Maradin HC 43	Apply the cleaning solution evenly over the floor, and leave it to work for a short time.	
		Clean the covering using a single-disc machine and a red pad.	
		Pick up the loosened dirt using a wet vacuum cleaner, and rinse with water.
