## PVC FLOOR COVERINGS, HETEROGENEOUS/MULTILAYER

PVC (polyvinyl chloride) is produced with the addition of softeners, fillers, pigments and stabilisers. The proportion of softener determines the malleability of the covering. Heterogeneous floor coverings made from PVC consist of a wear layer and filled sublayers with varying compositions. While the lower layers have a high proportion of filler (20-40%), and can be reinforced with a stabilisation insert, the thin top layer has a high proportion of PVC (40-60%). The duration of use for these coverings is heavily dependent upon the thickness and abrasion strength of this top layer. PVC coverings are to a great extent not sensitive to acids, alkalis and mechanical strain. However, they are highly sensitive to solvents.

### CLEANING

#### DEEP CLEANING

	Dirt	Treatment	Cleaning device
Pick up loose dirt, and remove mortar, plaster residue, and colour stains manually using a scraper.	<b>RESIDUE FROM CARE PRODUCTS</b>  in the form of coatings and care products can be removed using Corridor® Unic Ultra S 707, Corridor® Power Stripper S 708 or Planta® Multi Stripper P 321.	Apply the cleaning solution evenly over the floor, and leave it to work for approximately 10 to 15 minutes. <i>PLEASE NOTE: Do not allow the cleaning solution to dry.</i>	
		Deep clean the covering using the single-disc machine and a green pad.	
		Pick up the loosened dirt using a wet vacuum cleaner, and rinse with water.	

#### INTENSIVE CLEANING

	Dirt	Treatment	Cleaning device
Pick up loose dirt, and remove any mortar, plaster residue, and colour stains manually using a scraper.	<b>HEAVIER DIRT THAT IS ALKALINE-SOLUBLE</b>  like protein, oil and grease or foodstuff residue e.g. coffee, red wine etc. can be removed by intensive cleaning using Corridor® PUR Clean S 766. using a two-stage wet wiping method, or mechanically.	Apply the cleaning solution evenly over the floor, and leave it to work for a short time	
		Clean using a single-disc machine and a red pad	
		Pick up the loosened dirt using a wet vacuum cleaner, and rinse with water.

### DAILY ROUTINE CLEANING

	Dirt	Treatment	Cleaning device
Microfibre cloths or pads must always be used in order to achieve a satisfactory cleaning result.	<b>ORGANIC/INORGANIC CONTAMINATION</b>  like protein, oil and grease or foodstuff residue e.g. coffee, red wine etc.  Products with a minor care element such as Polybuz® Trendy T 201, Roca Wipe R 300 and Buz® Wipe G 270 or Corridor® PUR Clean S 766 floor cleaners are well-suited to daily routine cleaning.	Manual floor treatment	
	<b>INFECTION PREVENTION</b>	The products in the Buzil Budenat® portfolio are ideal for infection prophylaxis in defined areas (see Disinfectants).	

## CARE

### INITIAL TREATMENT

Due to their high-quality surface coating, these floor coverings cannot be coated or subject to initial treatment.
