POLYURETHANE FLOOR COVERINGS IN SPORTS HALLS

Polyurethane-based sports coverings are a type of surfacing. They consist of several layers, with a wear layer made from polyurethane. These coverings are laid, smoothed and sealed on site, and do not require an additional coating. Polyurethane-based sports floor coverings are sensitive to solvents, highly alkaline cleaning agents, and abrasive pads and brushes.

CLEANING

DEEP AND INTENSIVE CLEANING

	Dirt	Treatment	Cleaning device
Pick up loose dirt, and remove any mortar, plaster residue, and colour stains manually using a scraper.	HEAVIER DIRT THAT IS ALKALINE-SOLUBLE like protein, oil and grease or foodstuff residue e.g. coffee, red wine etc. can be removed by intensive cleaning using Maradin HC 43 using a two-stage wet wiping method, or mechanically.	Apply the cleaning solution evenly over the floor, and leave it to work for a short time.	
		Deep clean the floor covering using a single-disc machine and a red pad.	
		Pick up the loosened dirt using a wet vacuum cleaner, and rinse with water.	

SPECIAL CLEANING

	Dirt	Treatment	Cleaning device
Pick up loose dirt, and remove any mortar, plaster residue, and colour stains manually using a scraper.	RUBBER ABRASION The solvent-containing Indumaster® Forte IR 42 cleaner is particularly well-suited to removing rubber abrasion when diluted 1:1.	Spray the product onto targeted areas.	
		Scrub the covering using a single-disc machine and a suitable pad.	
		Pick up the loosened dirt using a wet vacuum cleaner, and rinse with water. <i>PLEASE NOTE: Perform a material compatibility test before use</i>
