QUARTZ-VINYL FLOOR COVERINGS

Quartz-vinyl floor coverings consist of a copolymer made from vinyl chloride and vinyl acetate. Mineral fibres, ground limestone, softeners and stabilisers are also added. These mineral fibres may be distributed homogeneously throughout the covering, or remain on the surface. This feature gives the coverings a very high degree of walking safety, and a decorative, sparkling appearance.

CLEANING

DEEP CLEANING

	Dirt	Treatment	Cleaning device
Pick up loose dirt, and remove mortar, plaster residue, and colour stains manually using a scraper.	ORGANIC/INORGANIC CONTAMINATION e.g. heavy oil, grease and protein deposits, can be removed using Perfekt G 440 or Indumaster® Intensive IR 44.	Apply the cleaning solution evenly over the floor, and leave it to work for approximately 10 to 15 minutes	
		Deep clean the covering using a single-disc machine and a microfibre or active fibre pad, or a cleaning machine with contra-rotating brushes	
		Pick up the loosened dirt using a wet vacuum cleaner, and rinse with water.	

INTENSIVE CLEANING

	Dirt	Treatment	Cleaning device
Pick up loose dirt.	HEAVIER DIRT THAT IS ALKALINE-SOLUBLE like protein, oil and grease or foodstuff residue e.g. coffee, red wine etc. can be removed by intensive cleaning using Corridor® PUR Clean S 766.	Apply the cleaning solution evenly over the floor, and leave it to work for a short time	
		Clean using a single-disc machine and a red pad	
		Pick up the loosened dirt using a wet vacuum cleaner, and rinse with water.

SPECIAL CLEANING

	Dirt	Treatment	Cleaning device
Pick up loose dirt.	RUBBER ABRASION The solvent-containing Indumaster® Forte IR 42 cleaner is particularly well-suited to removing rubber abrasion when diluted 1:1.	Spray the product onto targeted areas.	
		Scrub the covering using a single-disc machine and a suitable pad.	
		Pick up the loosened dirt using a wet vacuum cleaner, and rinse with water. <i>PLEASE NOTE: Perform a material compatibility test before use!</i>	 

DAILY ROUTINE CLEANING

	Dirt	Treatment	Cleaning device
Microfibre-based flat mops should be used to achieve optimum cleaning results.	ORGANIC/INORGANIC CONTAMINATION like protein, oil and grease or foodstuff residue e.g. coffee, red wine etc. Corridor® PUR Clean S 766 and products without a care element, such as Polybuz® Trendy T 201 and Buz® Wipe G 270 gloss cleaners and the high-moistening Roca Wipe R 300 floor cleaner are well-suited to daily routine cleaning.	Apply the cleaning solution evenly over the floor, and leave it to work for a short time.	
		Clean using a single-disc machine and a red pad.	
		Pick up the loosened dirt using a wet vacuum cleaner, and rinse with water.	 
	INFECTION PREVENTION	The products in the Buzil Budenat® portfolio are ideal for infection prophylaxis in defined areas (see Disinfectants).	

CARE

INITIAL TREATMENT

In order to retain the slip resistance and appearance of these floor coverings, they must not be coated, impregnated or subject to initial treatment.
