SEALED WOOD SURFACES

A wood surface is lacquered, coated or varnished using clear lacquer systems to protect it against external influences, particularly moisture. When cleaning, it must be ensured that the surface protection of the treated surface is intact, otherwise the wood will be damaged by permeating moisture. From a cleaning perspective, coated wood surfaces behave just like other lacquered and synthetic surfaces. However, as all types of wood surface are sensitive to moisture, persistent exposure to wet must be avoided.

CLEANING

DEEP AND INTENSIVE CLEANING

If necessary, pick up loose dirt.	Dirt	Treatment	Cleaning device
	HEAVIER DIRT THAT IS ALKALINE-SOLUBLE	Apply the cleaning solution evenly, and leave it to work for a short time	
	like blood, protein, felt-tip pen, graphite, oil and grease or foodstuff residue e.g. coffee, red wine can be removed using the intensive cleaner Aktiv G 433 applied by wiping.	Clean it with a suitable microfibre cloth or hand pad.
