OILED WOODEN FLOORS

The look and wear resistance of solid wooden flooring varies depending on the type of wood used. There are different designs of wooden floor, such as herringbone, long-plank flooring and small-block parquet, among others.

In order to aid good building biology, wooden floors are often impregnated with special oils in order to broadly retain the breathability of this natural material. Oiled wooden floors are sensitive to moisture. In contrast to untreated wood, oiled wooden surfaces can be dusted with a slightly dampened mop.

As all types of wooden floors are sensitive to moisture, prolonged exposure to wet must be avoided. Aqueous cleaning agents must only be used very sparingly in the cleaning process.

CLEANING

DEEP AND INTENSIVE CLEANING

	Dirt	Treatment	Cleaning device
Pick up loose dirt, and remove any mortar, plaster residue, and colour stains manually using a scraper.	RESIDUE FROM CARE PRODUCTS	Spray the wood flooring cleaner onto the floor covering undiluted (in sections of approximately 2m ²).	
	in the form of coatings and care products, can be removed using Parquet Stripper G 400.	Deep clean the covering using a single-disc machine and a blue/green pad.	
		Replace the pad regularly. <i>PLEASE NOTE: Ensure sufficient ventilation and do not smoke!</i>	

INTENSIVE CLEANING

	Dirt	Treatment	Cleaning device
If necessary, pick up loose dirt.	HEAVY DIRT AREAS WITH HIGH FOOTFALL like protein, oil and grease or foodstuff residue e.g. coffee, red wine etc. can be cleaned by intensive cleaning using Buzilin G 320.	Only apply product onto the floor undiluted and in sections, and clean it using a single-disc machine and a red pad

DAILY ROUTINE CLEANING

	Dirt	Treatment	Cleaning device
Microfibre-based flat mops should be used to achieve optimum cleaning results.	ORGANIC/INORGANIC CONTAMINATION		
	like protein, oil and grease or foodstuff residue e.g. coffee, red wine etc. Products with a significant care element such as Suwi Glanz G 210 and Buz® Soap G 240 wipe care products are suitable for daily routine cleaning. Buz® Soap G 240	Solid wood floors must ONLY be lightly sprayed and wiped <i>PLEASE NOTE: Regular polishing improves the appearance of the floors, and is recommended for retaining the value of the solid wood floor.</i>	 

CARE

INITIAL TREATMENT

Care	Treatment	Cleaning device
Perform initial treatment on the dried floor covering using Buzilin G 320.	Spray a thin layer of the undiluted product onto the floor covering.	
	Polish to a gloss using a single-disc machine and polishing brush/pad.
