## SEALED WOOD SURFACES

A wood surface is lacquered, coated or varnished using clear lacquer systems to protect it against external influences, particularly moisture. When cleaning, it must be ensured that the surface protection of the treated surface is intact, otherwise the wood will be damaged by permeating moisture. From a cleaning perspective, coated wood surfaces behave just like other lacquered and synthetic surfaces. However, as all types of wood surface are sensitive to moisture, persistent exposure to wet must be avoided.

### CLEANING

#### DEEP AND INTENSIVE CLEANING

	Dirt	Treatment	Cleaning device
If necessary, pick up loose dirt.	<b>HEAVIER DIRT THAT IS ALKALINE-SOLUBLE</b> like blood, protein, felt-tip pen, graphite, oil and grease or foodstuff residue e.g. coffee, red wine can be removed using the intensive cleaner Maradin HC 43 applied by wiping.	Apply the cleaning solution evenly, and leave it to work for a short time	
		Clean it with a suitable microfibre cloth or hand pad.	
		Pick up the loosened dirt, and rinse with water.	

#### SPECIAL CLEANING

	Dirt	Treatment	Cleaning device
If necessary, pick up loose dirt.	<b>GRAFFITI</b> We recommend Clean Up G 555 for removing graffiti (marker pens, stamping ink, etc.) in indoor areas.	Spray a cleaning cloth with Clean Up G 555, and clean the affected areas of the surface.	
		Rinse with water.
